

## Django Commands for Project & App Creation

### 1 Create a Django Project named Blog\_Project

Django-admin startproject Blog\_Project

### 2 App named Blog\_app

cd Blog\_Project

python manage.py startapp Blog\_app

### 3 Run

python manage.py runserver

- This starts the server at **http://127.0.0.1:8000/**
- Open a browser and visit **http://127.0.0.1:8000/** to see the default Django page.
