

**With respect to the table employee and department created, Create a stored procedure named as CountEmployee that returns the count of total number of employee**

**in employee Table.**

```
DELIMITER //
```

```
CREATE PROCEDURE CountEmployee(OUT total_count INT)
```

```
BEGIN
```

```
    SELECT COUNT(*) INTO total_count
```

```
    FROM employee;
```

```
END //
```

```
DELIMITER ;
```

```
CALL CountEmployee(@total_count );
```

```
SELECT @total_count ;
```
