## What is responsive image?

Responsive images are images that automatically adjust their size, resolution, and other properties to fit the dimensions and resolution of the device or viewport in which they are displayed.

It is very essential for the better user experience and for responsive web pages.

```
<img
src="image-default.jpg"
srcset="image-small.jpg 480w, image-medium.jpg 1024w, image-large.jpg 1600w"
sizes="(max-width: 600px) 480px, (max-width: 1200px) 1024px, 1600px"
alt="A sample image">
```

## **Benefits:**

- 1. Loads Faster
- 2. Size Adjustable
- 3. Better Quality
