Write a function to assign grades to employees based on their salary:

```sql
DELIMITER //

CREATE FUNCTION GetEmployeeGrade(salary FLOAT)
RETURNS CHAR(1)
DETERMINISTIC
BEGIN
    DECLARE grade CHAR(1);

    IF salary <= 10000 THEN
        SET grade = 'D';
    ELSEIF salary > 10000 AND salary <= 30000 THEN
        SET grade = 'C';
    ELSEIF salary > 30000 AND salary <= 60000 THEN
        SET grade = 'B';
    ELSE
        SET grade = 'A';
    END IF;

    RETURN grade;
END //
DELIMITER ;

CALL GetEmployeeGrade()

SELECT first_name, salary, GetEmployeeGrade(salary) AS Grade FROM employee;
```
