Look at the code given, identify the combinator used in it.

Q1: div ~ p

- Combinator: General Sibling Combinator (~)
- Explanation: Targets all <p> elements that are siblings of a <div> element and come after it.

Q2: div + p

- Combinator: Adjacent Sibling Combinator (+)
- Explanation: Targets the first <p> element that immediately follows a <div> element.

Q3: div > p

- Combinator: Child Combinator (>)
- Explanation: Targets <p> elements that are direct children of a <div> element.
